

## Summer 2020 Internship Opportunity at AISC

---

AISC is now accepting applications from students enrolled in structural, architectural or civil engineering programs for a full-time paid internship position at AISC's headquarters in downtown Chicago for Summer 2020. Qualified applicants will be in, at least, the third year of their curriculum and will have completed at least one course in structural steel design. Students should be planning to continue with their education full time in Fall 2020 to be considered. AISC interns support the AISC Engineering and Research Department in developing technical resources for structural steel design.

Interested students should submit their resumes, including their cumulative GPA and a list of related coursework, by February 22 to [hr+internships@aisc.org](mailto:hr+internships@aisc.org) with “E&R Summer Internship” in the subject line. Any related inquiries can be sent to the same address.
